<td>Norvasc® 10 mg tablets, Amlodin® 10 mg tablets</td>
</tr>
</tbody>
</table>

2. Product attributes (Pramipexole hydrochloride tablets)

Daiichi Sankyo Espha has created innovative labeling on tablets and PTP sheets to make them easier for patients to see and understand.

- “Pitch control” - Through pitch control on both sides of the tablet, it is possible to display the product name and dosage on each pill, making it easier for patients to recognize.
- Design that allows for easy identification - Special markings on both sides of the PTP sheets to make tablets easier to identify.
- PTP sheets also employ a material to block light while still allowing tablets to be visible.
- GS1 data barcode - In order to prevent medication errors, the GS1 data barcode is marked on each tablet.
Example: Pramipexole Hydrochloride 0.5 mg DSEP tablets and PTP sheets

About Daiichi Sankyo Espha
Daiichi Sankyo Espha was created in April 2010 to manufacture and market generic drugs and accommodate rising demand based on the spirit of the Daiichi Sankyo Group corporate philosophy* of supplying pharmaceuticals to address diverse medical needs. Daiichi Sankyo Espha strives to provide pharmaceuticals that provide peace of mind for users by fulfilling the most important pharmaceutical criteria of quality, information, and stable supply while delivering the economic benefits of generics.
